

CSCE 580: Introduction to AI

Weeks 16 - Lectures 28 and 29: Project (B) Presentations

PROF. BIPLAV SRIVASTAVA, AI INSTITUTE

2ND AND 4TH DEC 2025

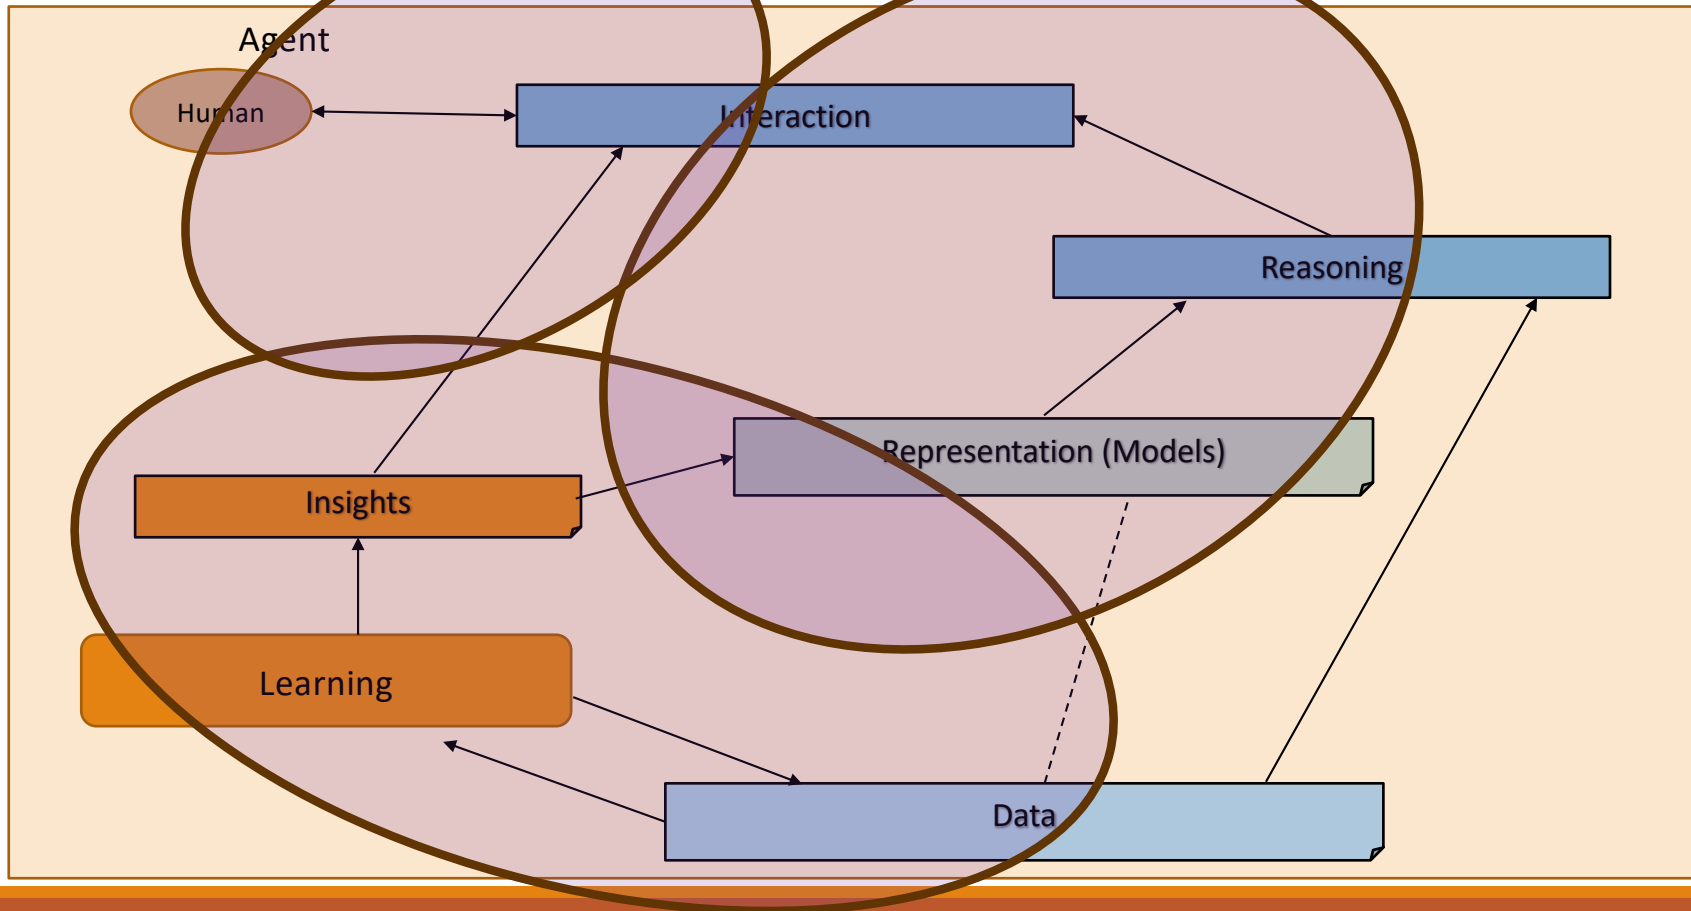

Carolinian Creed: “I will practice personal and academic integrity.”

Organization of Week 16 - Lectures 28, 29

- Introduction Section
 - Recap from Weeks 14 (Lectures 26, 27)
 - AI news
- Main Section
 - Lectures 28, 29: Project B presentations
- Concluding Section
 - Ask me anything

Relationship Between Main AI Topics (Covered in Course)

Recap of Weeks 14

We discussed

- Lecture 26: Graduate paper presentations
- Lecture 27: AI for the Real World – Bringing All Together; Advanced Topics

- Week 1: Introduction, Aim: Chatbot / Intelligence Agent
- Weeks 2-3: Data: Formats, Representation and the Trust Problem
- Week 3: Machine Learning – Supervised (Classification)
- Week 4: Machine Learning - Unsupervised (Clustering) –
- Topic 5: Learning neural network, deep learning, Adversarial attacks
- Week 6: Large Language Models – Representation and Usage issues
- Weeks 7-8: Search, Heuristics - Decision Making
- Week 9: Constraints, Optimization – Decision Making
- Topic 10: Markov Decision Processes, Hidden Markov models - Decision making
- Topic 11-12: Planning, Reinforcement Learning – Sequential decision making
- Week 13: Trustworthy Decision Making: Explanation, AI testing
- Week 14: AI for Real World: Tools, Emerging Standards and Laws; Safe AI/ Chatbots

Introduction Section

Upcoming Evaluation Milestones

- Projects B: Sep 30 – Nov 20
- Quiz 2: Oct 7
- Quiz 3: Nov 11
- Paper presentation (grad students only) : Nov 18
 - Put paper names in spreadsheet
- **Finals: Dec 11 – take home** (given Dec 4, due Dec 11 before class)

Class Survey

Take 5 mins to complete

AI News

#1 NEWS – Porous Friday

- Security breaches related to AI use and research/ development on Thanksgiving (Nov 27, 2025)

-
- OpenAI incident: <https://openai.com/index/mixpanel-incident/>
 - User credentials lost
 - Contractor side incident
 - OpenReview: https://medium.com/%40billxu_atoms/the-day-anonymity-died-inside-the-openreview-iclr-2026-leak-ee687e7a8041
 - Issue with API
 - Reviewers deanonymized, affecting double-blind reviews of many top AI conferences

Main Section

Lecture 28 and 29: Project Presentations

Projects B: Sep 30 – Nov 20 (7 weeks; 400 points)

- End date: **Thursday, Nov 20**
 - Remember to update spreadsheet on data/ time when finished (**Column I**)
- Choices
 - Given by instructor, OR
 - Custom: defined by student using project-b template; reviewed and approved by instructor

Presentation Guidelines - Content

- Custom project
 - 2-slides on custom project
- Given project
 - 1-slide: Status and challenges faced
 - 1-slide: What would be one custom project you would like to do – fill project template

Presentation Guidelines - Deliverables

- Report and code in your GitHub **[300 points]**
- Presentation in Google folder before start of class on Dec 2 **[100 points]**
 - 20% presentation penalty if not before deadline
- Presentation time: 2-3 minutes, including Q-A

Weeks 16: Concluding Comments

A variety of projects possible

- some tried, others outlined
- learned methods to execute in practice

- Week 1: Introduction, Aim: Chatbot / Intelligence Agent
- Weeks 2-3: Data: Formats, Representation and the Trust Problem
- Week 3: Machine Learning – Supervised (Classification)
- Week 4: Machine Learning - Unsupervised (Clustering) –
- Topic 5: Learning neural network, deep learning, Adversarial attacks
- Week 6: Large Language Models – Representation and Usage issues
- Weeks 7-8: Search, Heuristics - Decision Making
- Week 9: Constraints, Optimization – Decision Making
- Topic 10: Markov Decision Processes, Hidden Markov models -
Decision making
- Topic 11-12: Planning, Reinforcement Learning – Sequential decision making
- Week 13: Trustworthy Decision Making: Explanation, AI testing
- Week 14: AI for Real World: Tools, Emerging Standards and Laws; Safe AI/ Chatbots

Weeks 17: Exam Session – Last Meeting

[Optional]
Open-ended discussion

4pm on 9 Dec 2025 for 1-hr

- Week 1: Introduction, Aim: Chatbot / Intelligence Agent
- Weeks 2-3: Data: Formats, Representation and the Trust Problem
- Week 3: Machine Learning – Supervised (Classification)
- Week 4: Machine Learning - Unsupervised (Clustering) –
- Topic 5: Learning neural network, deep learning, Adversarial attacks
- Week 6: Large Language Models – Representation and Usage issues
- Weeks 7-8: Search, Heuristics - Decision Making
- Week 9: Constraints, Optimization – Decision Making
- Topic 10: Markov Decision Processes, Hidden Markov models -
Decision making
- Topic 11-12: Planning, Reinforcement Learning – Sequential decision making
- Week 13: Trustworthy Decision Making: Explanation, AI testing
- Week 14: AI for Real World: Tools, Emerging Standards and Laws; Safe AI/ Chatbots
