

Edwin J. Wood

Director of Software Development | Enterprise Application Strategy & Delivery | Platform Modernization

Columbia, SC • 803.979.2778 • edwinjwood@gmail.com • [linkedin.com/in/edwin-j-wood](https://www.linkedin.com/in/edwin-j-wood) • edwinjwood.github.io

Professional Summary

Strategic technology and solutions architecture leader with 13+ years' experience designing and delivering scalable enterprise platforms, customer-facing portals, and high-throughput transactional systems. Proven success modernizing legacy systems, architecting secure cloud-native applications, and aligning technical roadmaps with business strategy. Expertise spans **CRMs, middleware integration, identity modernization, and observability frameworks**. Recognized for driving cross-functional delivery with vendors and distributed teams while elevating engineering standards and ensuring cybersecurity, reliability, and performance at scale.

Core Leadership & Technical Competencies

- **Architecture & Strategy:** Enterprise Application Modernization • eCommerce Platforms • Cloud-Native Design (AWS/Azure) • Secure & Scalable Architecture • Roadmap Execution
- **Application Development:** JS (React, Next.js, Node.js), .NET (C#, ASP.NET Core, .NET Framework, WebAPI layer, Blazor, Entity Framework) • Java • SQL/Postgres • X++ • Payment Integrations (Stripe, internal engines)
- **Integration & Middleware:** Full API Lifecycle • REST/JSON • iPaaS (Mulesoft) • Event-Driven Patterns • OSS/BSS Integrations
- **Delivery Leadership:** Agile/Scaled Agile • CI/CD (Azure DevOps, GitHub Actions) • Observability • Vendor & Offshore Management • SSDLC/STLC Oversight
- **Security & Compliance:** Identity & Access (OAuth2, MFA, OIDC, SAML) • Data Quality & Governance • Cybersecurity Readiness & Testing • IAM / VPC design
- **Data & Analytics:** Power BI • ESRI Geospatial Visualization • KPI Dashboards • Data Storytelling

Professional Experience

Segra (formerly Spirit Communications & Lumos) — Columbia, SC

Director of Software Development | 2018–2025

Application Development Manager / Technical Lead / Analyst | 2012–2018

Architecture & Modernization Leadership

- Redesigned operating model into product-led pods, elevating delivery focus, accountability, and velocity.
- Architected **cloud migrations** including Dynamics 365 to Azure (serverless functions, Power Apps adoption) and Liferay to ServiceNow, improving scalability, security, and UX agility.
- Consolidated overlapping enterprise platforms (CRM, portals, OSS/BSS) into unified systems, reducing redundancy and enabling modernization funding.
- Advanced **CI/CD pipelines and observability** standards across teams, increasing release safety and platform reliability.

eCommerce & Customer Experience Platforms

- **Segra360 Customer Portal (0–1):** Architected and delivered a customer self-service platform integrating billing, ticketing, orders, and usage; implemented OAuth2/OIDC/MFA; reduced support volume by 40%.
- **Business Proposal Automation:** Developed .NET solution for branded proposals; integrated approvals, contracts, and e-signature workflows, accelerating sales cycles.

- **SaaS Payments Prototype (personal):** Built full-stack platform with Stripe, PostgreSQL, Node.js, React/Vite/Tailwind to demonstrate resilient webhook handling, CI/CD automation, and modern payment workflows.

Integration & Data Platforms

- **SegraMaps (0-1 Visualization):** ESRI-based tool integrated with CRM, visualizing infrastructure and accelerating pre-sales decisions; comparable to event/ticketing visualization in eCommerce.
- Directed **Salesforce to Dynamics migration** post-M&A, aligning processes, migrating data, and establishing a unified operating cadence.
- Built **workflow automation & deal economics engine** in Dynamics, digitizing manual approvals with embedded economic guardrails.
- Implemented **HubSpot to ServiceNow bidirectional integration via MuleSoft**, improving lifecycle continuity, reducing manual data entry, and enabling resilient bi-directional sync.

Delivery & Governance

- Established KPI frameworks (throughput, cycle time, SLA adherence) embedded into portfolio reporting and exec dashboards.
 - Partnered with executives and finance to sequence multi-year strategic roadmaps and integrations.
 - Directed distributed Agile teams and vendor partnerships, managing multi-million-dollar software portfolio delivery.
-

Education

University of South Carolina — Columbia

Bachelor of Science in Computer Science (May 2026)
